Real-time Rendering Plugin for Revit, SketchUp and Rhino

COMPELLING RESULTS WITH ENSCAPE

Who We Are

Enscape is an easy to use real-time rendering plugin. Enscape provides architects with a quicker way to create rich real-time 3D visualization renderings. This allows for faster design iterations with less preparation time, allowing instantaneous design reviews and presentations.

Enscape has a passion for 3D and VR. The generated walk-through can be viewed in virtual reality or exported into a video within seconds. No extra training needed.

SIMPLE TO USE

Enscape is easy to install and even easier to use. There's no extra software, it integrates right into Revit, SketchUp, and Rhino. No need for time-consuming education to learn a new program. It's just one click.

ONE CLICK VR

With just one click you can turn your generated walkthrough into a Virtual Reality experience. You or your client can be fully immersed in the design with the use of VR headsets and Enscape.

DESIGN REVIEW & PRESENTATION

A live presentation is a great way to communicate designs. The client can request changes that are instantly visible. The walkthrough can also be used internally for design meetings and quick reviews.

Floating licenses

A floating license can be used on multiple machines, as long as the number of opened Enscape windows does not exceed the number of licenses.

Fixed-Seat licenses

A fixed-seat license is limited to one machine.
